VOLUME 20 NUMBERS 1-12

1977 Annual Index

TECHNICAL/APPLICATION FEATURES & NOTES

ANTENNAS/RADAR SYSTEMS

Barker, J., and M. E. Davis, "Ku-Band Linear Phased Array," No. 10, p. 44.

Braine, M. R., "Antenna Design for Offshore Satellite Links," No. 9, p. 59.

Chapman, D. J., "Adaptive Arrays and Sidelobe Cancellers; A Perspective," No. 8, p. 43.

Collier, M., "Microstrip Antenna Array for 12 GHz TV," No. 9, p. 67.

Davis, M. E., C. E. Grove, and J. K. Smith, "L-Band T/R Module for Airborne Phased Array," No. 2, p. 54.

Ehrenspeck, H. W., and J. A. Strom, "The Short Backfire Antenna – A Highly Efficient Array Element," No. 5, p. 47.

Frank, J., "Discrete-Beam Phased Array," No. 10, p. 31.

Hansen, R. C., "Workshop on Electrically Small Antenna," No. 2, p. 66.

Mailloux, R. J., "Phased Array Aircraft Antennas for Satellite Communications," No. 10, p. 38.

Mangulis, V., "An Approximation for Diffraction By A Circular Cylinder," No. 9, p. 72.

May, G., "Determining the Point of Reflection on MW Radio Links," No. 9, p. 74.

Ohtake, T., H. Reichert, and L. T. Seaman, "Japanese Broadcast Satellite," No. 9, p. 53.

Phelan, H. R., "L-Band Spiraphase Reflectarray," No. 1, p. 47.

Phelan, H. R., "Dual Polarized Spiraphase," No. 3, p. 37*.

Phelan, H. R., "Spiraphase Reflectarray for Multitarget Radar," No. 7, p. 67.

Tsandoulas, G. N., "Tolerance Control In An Array Antenna," No. 10, p. 24.

DESIGN

Crampagne, R., "Analysis and Synthesis of MIC Transmission Lines," No. 6, p. 105.

Hayes, A. E. Jr., "Elliptical Integrals Simplified," No. 9, p. 83.

Henning, H. B., "Impedance Matching by Graphical Techniques," No. 6, p. 112.

Rizzoli, V., "Analysis and Design of Microstrip DC Blocks," No. 6, p. 109.

INSTRUMENTS/MEASUREMENTS

Ahmed, M. J., "Swept Frequency AM to PM Conversion Measurement," No. 12, p. 58.

Bassen, H., and W. Herman, "EM Probe with Fiber Optic Telemetry System," No. 4, p. 35.

Birkemeier, W. P., P. Sierak, and A. E. Sill, "Precision Alignment Procedure for Troposcatter Systems," No. 3, p. 33.*

Cohen, J., "Dynamic Non-Linearity Measurements in FM Systems," No. 9, p. 63.

Deficis, A., and A. Priou, "Non-Perturbing Microprobes for Measurement in Electromagnetic Fields," No. 4, p. 55.

Kernweis, N., and J. McIlvenna, "Liquid Crystal Diagnostic Techniques Aid Microstrip Design," No. 10, p. 47.

Lance, A. L., W. D. Seal, F. G. Mendoza, and N. W. Hudson, "Automated Phase Noise Measurements," No. 6, p. 87.

McSherry, L. K., "Ionospheric Scintillations at SHF," No. 6, p. 99.

Vogel, W., "Graph Points You Toward Any Synchronous Satellite," No. 10, p. 56.

Wait, D. F., "Satellite Earth Terminal G/T Measurements," No. 4, p. 49.

Walshak, L., and W. E. Poole, "Thermal Resistance Measurement by IR Scanning," No. 2, p. 62.

COMPONENTS/SUBSYSTEMS

Arfin, A. D., and T. L. Nevue, "Shrinking Attenuators for MIC and Stripline Applications," No. 5, p. 51.

Boyd, C. R. Jr., "Analog Rotary-Field Ferrite Phase Shifter," No. 12, p. 41.

Bristol, T. W., "SAW Devices and Applications – A Status Report," No. 12, p. 16.

Field, M. and H. Howe, Jr., "Filter Integration for Multi-Function Assemblies," No. 5, p. 39.

Gratze, S. C., "SAW Oscillators – Their Current Status," No. 12, p. 45.

Jackson, R. V., and J. C. Papp, "YIG-Tuned Integrated Devices," No. 12, p. 51.

LaTourrette, P., "Combline Filter Multiplexers," No. 8, p. 55.

Molnar, E., "SS Amplifier for MARISAT Shipboard Terminals," No. 9, p. 80.

Napier, R. S., and C. E. Foster, "18-40 GHz Broadband Frequency Synthesizer Technique," No. 4, p. 40.

Nussbaum, S., and E. Sard, "Broadbanding A Ka-Band Parametric Amplifier," No. 11, p. 57.

Painter, B., "Attenuating Circumstances: Microwave Passive Coaxial Attenuators – An Overview," No. 4, p. 16.

Rappolt, F., and N. Stone, "Receivers for Signal Acquisition," No. 1, p. 29.

Robinson, B., "Supercomponents – Subsystem Performance from Component Technology," No. 5, p. 29.

Schaer, A., and E. D. Maloney, "GHz Fundamental Acoustic-Wave Oscillators," No. 1, p. 41.

Stitzer, S. N., H. Goldie, and P. S. Carter, Jr., "X-Band Frequency-Selective YIG Limiter for FM/CW Radar," No. 12, p. 35.

Weissglas, P., and S. Svensson, "Local Oscillators for Frequency Agile Systems," No. 1, p. 35.

ELECTRON DEVICES

Abe, H., Y. Takayama, A. Higashisaka, and H. Takamizawa, "Stabilized C-Band GaAs FET Oscillator," No. 10, p. 52.

Brown, R. G., "Multi-kW, Multi-Octave Solid State Amplifiers," No. 8, p. 49.

Cohen, E. D., "TRAPATTS and IMPATTS – State of the Art and Applications," No. 2, p. 22.

Emery, F. E., "Low-Noise GaAs FET Amplifiers," No. 6, p. 79.

Garrigus, W. E., "Phase Noise Performance of Magnetrons," No. 7, p. 59.

Gawronski, M. J., and H. Goldie, "200 W MIC L-Band Receiver-Protector," No. 5, p. 43.

Ivanek, F., and W. E. Schroeder, "Workshop: Terrestrial Radio Relay S-S Transmitter Technology," No. 9, p. 42.

Kaisel, S., "Microwave Tube Technology Review," No. 7, p. 23.

Perlow, S., "Transistor Amplifier Design Considerations," No. 8, p. 22.

Peterson, C., "GaAs FET – A Bilateral Device," No. 1, p. 53.

Pitzalis, Jr., O., "Status of Power Transistors – Bipolar and Field Effect," No. 2, p. 30.

Ricci, P., and C. Lucchi, "Notes on the Linearity of Satellite Communication TWTs," No. 7, p. 78.

Steinkamp, J., "Microwave Semiconductor Applications in Communications Systems," No. 3, p. 57.

* North American Edition Only

Strangmann, D., and K. Pichler, "Cavity Resonators for UHF-TV Transmitters," No. 11, p. 63.

Vlaardingerbroek, M. T., "Microwave Semiconductor Applications in Communications Systems," No. 2, p. 49.

Weinstein, M., and R. Winkowski, "Voltage Tunable Magnetron Update," No. 7, p. 75.

MILLIMETER WAVES

Lazarus, M. J., K. Y. Cheung, and S. Novak, "Improved mm-Wave Gunn Mixer Receivers," No. 3, p. 43.

MWJ Staff, "Millimeter Waveguide Systems," No. 3, p. 24.

Nicholson, B. F., and B. K. Watson, "Millimeter Wave Multiplexing," No. 11, p. 51.

Tresselt, C., and Y. K. Wu, "mm Radar for Highway Collision Avoidance," No. 11, p. 39.

Weinreb, S., R. Predmore, M. Ogai, and A. Parrish, "Waveguide System for a Very Large Antenna Array," No. 3, p. 49.

Windermann, J. B., and G. N. Hulderman, "Solid State mm-Wave Pulse Compression Radar Sensor," No. 11, p. 45.

EDITORIALS
